Bountiful, Utah 84010

Subject: Reclamation Required, Utah Mineral and Fossil, Solar Wind 1&2, S/023/0061, Juab County, Utah

Dear Mr. Holfert:

The Division of Oil, Gas and Mining requires reclamation of the referenced mine site. Regrading, topsoiling, and seeding must be completed no later than October 15, 2011. This requirement is being made pursuant to rule R647-3-113.5 which allows the Division to require reclamation after the mine has been inactive for five years or more. The Division has never received an annual report for this site as required by R647-3-117.1 showing whether the site has been active, but inspections indicate there has been no mining activity for at least five years. Additionally, you have failed to increase the reclamation surety as required by both the Division and the Bureau of Land Management.

Failure to complete reclamation by this date will result in withdrawal of the Notice of Intention to Commence Small Mining Operations, a request to the Bureau of Land Management to forfeit the reclamation surety, and a possible cessation order and associated fine.

If you have any questions regarding this notice, please contact me at 801-538-5261 or Wayne Western at 801-538-5263.

Sincerely,

Paul B. Baker
Minerals Program Manager
